Omnec Onec, Wendelle Stevens : Omnec Onec: Ambassador From Venus before purchasing it in order to gage whether or not it would be worth my time, and all praised Omnec Onec: Ambassador From Venus:

DO THEY LIVE HERE AMONGST US? Have Aliens Walked In To Earthly Bodies? It s a part of UFO research and the paranormal you seldom hear about, stresses Timothy Green Beckley, editor of the Conspiracy Journal and long time investigator of the unexplained. I have often heard stories of human-looking, Nordic-like, aliens living amongst us, having become part of our society without the knowledge of their neighbors. They are even said to have married humans. One should recall that in Genesis it says that the sons of God in those days mated with the daughters of men, who were lovely and fair, to produce a race of giants. The late Dr. Frank E. Stranges said he once met a man inside the Pentagon who was from another world and could read minds. The visiting stranger had no fingerprints because there was no crime on his home planet nor any wars. A college professor once told me how he had witnessed the landing of a spaceship and saw its alien crew emerge and drive off in an American-made automobile, only to see one of them standing in a supermarket line shortly thereafter. The unique work you are now holding is the personal account of a living human being who was, with her full consent and active cooperation, transported to Earth in a spacecraft from her home planet. She arrived in the company of her paternal uncle after being carefully prepared and conditioned to live here and grow in the physical society of the native life-wave of our own planet. And the remarkable thing is that Omnec Onec is still here, perhaps getting ready to reemerge from hiding once more as our planet s people go through tough times yet again. Before she arrived on this planet, she was carefully conditioned to our density and became physically manifest in an earth-body equivalent to a 7 year old girl. Her uncle and the crew who brought her here introduced her into a Tennessee family who had just lost their own little daughter. And although Omnec had the appearance of a 7 year old, she had the Venusian wisdom and knowledge of her 210 year equivalent at the time of her arrival here in 1955. This then is her story of her early life on Venus, her arrival here in the middle of our first modern excitement over UFOs, her preparation and adaptation to Earth living and its peculiar problems, unknown to her on her home planet. Copies of the first printing of the hardcover edition of this book have been selling for upwards of \$700 on the net. And one copy went in auction for around \$1800.00. Due to a personal relationship with Col Wendelle Stevens (Ret) we are able to make copies of this work available to the vast number of people who have clamored for it but could not obtain a copy at a reasonable cost. IT MUST BE NOTED THAT THIS WORK IS DEFINITELY NOT SCIENCE FICTION - BUT A BOOK FULL OF REMARKABLE TRUTHS THAT CAN ONLY AT THIS TIME BE

PRESENTED TO EARTHLY DWELLERS FOR THEIR PERSONAL BETTERMENT!
